

# Kevin T

IT Deployment Lead | Infrastructure Solutions Architect

## Professional Overview

Results-driven IT professional specializing in large-scale deployments and seamless technology integration. Expert in orchestrating infrastructure rollouts while ensuring business continuity through comprehensive disaster recovery planning.

## Core Responsibilities

- ✓  Deployment Leadership - Directing enterprise-wide hardware/software implementations
- ✓  Systems Integration - Bridging legacy and modern systems for optimal performance
- ✓  Disaster Recovery - Designing and testing robust business continuity plans
- ✓  Infrastructure Scaling - Planning and executing phased technology rollouts
- ✓  Technical Oversight - Managing cross-functional deployment teams

## Value Proposition

- ◇  Project Excellence - Delivering complex deployments on time and under budget
- ◇  Change Management - Minimizing disruption during technology transitions
- ◇  Crisis Preparedness - Ensuring rapid recovery from system failures
- ◇  Stakeholder Alignment - Translating technical requirements into business solutions

## Technical Expertise

-  Deployment Tools: SCCM, Intune, PDQ Deploy
-  Virtualization: VMware, Hyper-V, Azure Migration
-  DR Solutions: Veeam, Zerto, Rubrik
-  Monitoring: SolarWinds, PRTG, LogicMonitor

## Professional Philosophy

*"Technology deployments should drive business value - not complexity. My approach combines meticulous planning with agile execution to deliver solutions that just work."*

## Key Achievements

- Successfully migrated 500+ endpoints to new ERP system with zero downtime
- Reduced deployment timelines by 40% through automation
- Achieved 99.99% uptime through proactive DR planning
