

Bridge IT Support

High-Performance Networks

(Fast. Secure. Reliable. Built for Business.)

🌐 Redefining Network Infrastructure for Modern Businesses

At Bridge IT Support, we design and implement high-performance networks that form the foundation of your digital ecosystem. Whether you're running multiple locations, remote teams, or high-volume applications, our tailored networking solutions ensure speed, security, and scalability—from LAN to cloud.

⚡ What Makes a Network “High-Performance”?

A high-performance network must be:

- 🚀 Fast – Gigabit and fiber-speed connectivity with low latency
- 🛡️ Secure – Encrypted, segmented, and actively monitored
- 🔄 Scalable – Grows with your users and infrastructure
- 🔧 Reliable – Built with redundancy and proactive maintenance

📁 Bridge IT Network Solutions

Component	Description
🖨️ LAN/WAN Design	Structured cabling, VLANs, and managed switching.
📶 Wireless Access Points	Enterprise-grade WiFi 6 deployment using Ubiquiti Unifi.
💧 Firewalls & VPN	VOX and FortiGate solutions with remote access control.
🌍 Multi-Site Networking	Secure inter-branch connectivity across South Africa.

Component	Description
-----------	-------------

 Monitoring & Reporting	Real-time analytics and alerts via advanced tools.
--	--

 Built for Businesses Like Yours	
---	--

Our networks support:

-  Retail & POS Systems – Always-on connections across stores
-  Warehouses & Logistics – Wireless coverage and inventory sync
-  Offices – VoIP, CCTV, remote desktops, and collaboration tools
-  Remote Teams – VPN-secured access to company infrastructure
-  Customer WiFi – Guest network segmentation and branding

Page 2

Resiliency You Can Count On

Failover Internet

LTE backup routers to ensure uninterrupted operations during fiber outages.

Segmented Networks (VLANs)

Separate departments, devices, and guest traffic for performance and security.

Proactive Maintenance

We monitor performance metrics and network health 24/7.

Remote Support

Quick issue resolution via TeamViewer and AnyDesk for all locations.

What We Offer

-  Network Architecture Design

- Switch & Router Configuration
- Bandwidth Optimization
- Firewall and Access Policy Management
- Wireless Heat Mapping & Optimization
- Camera & Security Integration

Why Bridge IT?

- Experienced Network Engineers with certifications
- National Coverage – We service all major cities and regions
- Proactive Monitoring – Identify and solve issues before they impact you
- Vendor Partnerships – VOX, Unifi, Mikrotik, Fortinet
- 24/7 Local Support with remote and onsite options

Let's Build a Better Network
